

New

Ideal for safety management during LNG cargo purging work!

LNG Portable Gas Monitor

Model FI-8000 + GX-8000

Hybrid models featuring an optical interferometric sensor and thermal conductivity sensor for accurate LNG measurements, even with differing gas compositions and vaporization rates!

Accurate measurements of C1 to C4 paraffinic hydrocarbon gas mixtures!

Ez TIIS (Japan Ex)

Ez ATEX

Ez IECEx

Ez CE marking

Features

- z Capable of accurately measuring N₂-base LNG components
- z Inherently safe explosion-proof construction Ex ia IIC T4 (TIIS/ATEX/IECEx)
- z IP 67 protection rating ensures a safe work environment even outdoors.
- z Complies with SIGTTO measurement guidelines.
- z Improves safety and productivity during LNG cargo work.
